Once your finances are organized, you'll be able to spend less time on money management tasks and more time enjoying your financial well-being.

Now that you know what steps to take, it's time to take action. Use this simple checklist to start organizing your financial life today. **Need help? Give us a call.**

- TRACK YOUR SPENDING**
Tracking your daily spending is a great way to determine where your money is going. Take a few minutes each day to enter your daily expenses in a pocket notebook, spreadsheet or app on your smartphone.
- CALCULATE YOUR CASH FLOW**
Cash flow is simply "money in" (income) and "money out" (expenses). Subtract your expenses from your income. The result is your monthly cash flow.
- CREATE A BUDGET**
Sticking to a budget can help you keep your spending in check and manage your money in a way that aligns with your goals and priorities.
- AUTOMATE SAVINGS AND BILL PAYMENTS**
Pay yourself first by setting up an automatic savings program. If your employer offers a 401(k) plan, this is an easy way to save for retirement by allowing you to contribute automatically to a 401(k) account. To better handle bill payments, automate them by using your banks' online bill pay or money transfer options.
- SET UP A FILING SYSTEM**
An effective filing system will help keep your financial records organized. Where possible, "go paperless" so you receive and store documents electronically. Set up a file system for any paper bills or statements you receive in the mail and spend a few minutes organizing them each month.
- UPDATE DOCUMENTS PERIODICALLY**
Check your financial documents annually to make sure that all of your personal information, including emergency contacts and beneficiaries, is accurate and up to date.
- SET FINANCIAL GOALS**
Set specific, measurable financial goals, whether it's paying off debt, saving a specific amount each month for retirement or reaching an important financial milestone.
